

Big Solutions for Small Businesses

Mimic Technologies is dedicated to the implementation of business continuity and disaster recovery systems for small to medium sized businesses. We provide big business solutions for small businesses.

We have more than 35 years of combined experience in IT consulting, computer system and software design, network infrastructure design, installation, and administration for Fortune 500 companies as well as small and medium sized businesses throughout the country. We also have over a decade of experience in regulatory compliance as it relates to financial markets, healthcare, and data privacy.

At Mimic Technologies, we know how to translate the functionality and features of massive enterprise systems into solutions that are simple to set up, easy to use, completely automatic and, most importantly, secure and completely reliable—even if you don't have an army of IT specialists on hand.

Protect Your Business From Data Loss Disaster

Data loss equals:

- Loss of critical info
- Loss of time
- Loss of money
- Penalties and fines for regulatory non-compliance
- Loss of client confidence

Prevent data loss disaster with MimicDisc

Performing regular system and data backups is wise for any company. For Registered Investment Advisors, it's the law. As important as compliance and data security is, many companies don't do an adequate job.

Don't wait until disaster strikes to think about where your company stands.

As an RIA, you've got a lot riding on your backups. Not only are your data and storage processes a matter of considerable regulation, but the viability of your business depends on it.

How Secure is Your Data?

Have you backed up your data within the last 3 months? Yes No

Have you tested your backups to make sure they are complete, uncorrupted and work? Yes No

Have you stored your backup data in a secure remote site? Yes No

Is your data encrypted? Yes No

Do you have a system in place to handle backups automatically? Yes No

Can backup and restoration be accomplished over the Web? Yes No

Do you have reliable 24/7/365 support for your backup system? Yes No

If you answered "No" to any of these questions, you are taking unnecessary risk with your data.

Prevention Is Easy

The nightmare of data loss is easy and inexpensive to prevent. Mimic Technologies developed MimicDisc with a deep appreciation of the special needs of RIAs in terms of risk and compliance.

- Off-site storage for protection against physical damage
- Military level encryption data security
- Efficient compression to save the cost of disc space and reduce the time needed to complete backups or restores
- Compatible with a variety of operating platforms, databases and hardware
- Supports 21 major languages
- Unlimited backups
- Automated backup scheduler
- Backup and restore over the Web through a secure SSL channel
- 24/7/365 support
